

## ByteWare—Plug & Play

### Get ready to start using in minutes

ByteWare appliances offer plug-&-play high performance servers for busy IT professionals.

Extremely portable, take it wherever you want in your laptop bag • Ideal for Demonstration and quick Oracle product presentations • No need to invest in dedicated server so cost is extremely low • No administration knowledge required to configure complex software.

### Key Usage

Accelerate help desk resolution of end-user problems with a library of pre-configured virtual machines • Run software demos of complex or multi-tier configurations on a single laptop • Entire instance at your disposal to Practice administration/development/functional knowledge base • Training institutes can reduce total cost of ownership of servers.

## 2 NODE RAC

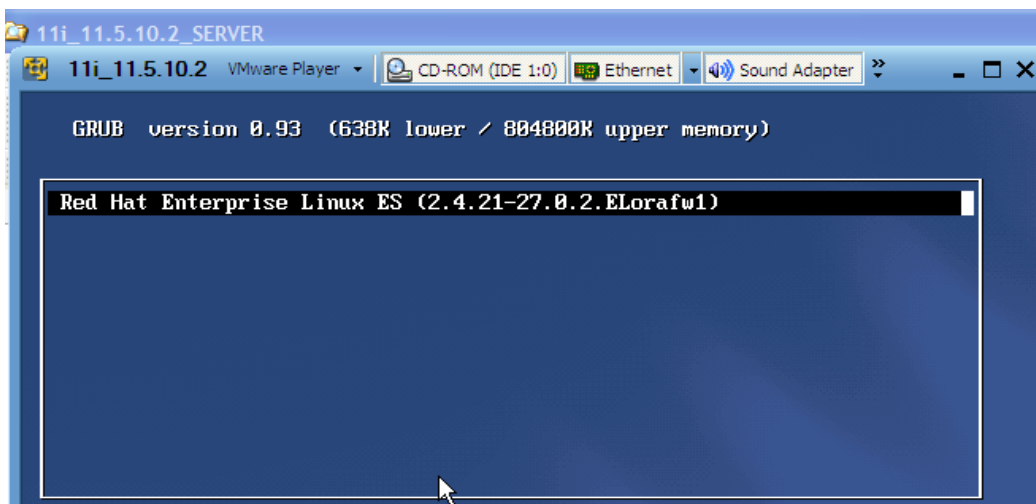

### Get 2 Node RAC NOW!

- 10g—10.2.0.3 CRS
- 10g—10.2.0.3 ASM
- 10g—10.2.0.3 OH

**Ideal for quick Oracle product presentations.**

### Training Centers—Attention!

- Reduce hardware costs by 50-60%
- Increase operations efficiency by up to 50% by reducing hardware needed in classroom
- Start saving DBA research time
- Reduce time needed to test new software and improve quality of deployments

**Buy ByteWare and start saving on operational TIME now!**

# ByteWare—Plug & Play

## 2 Node RAC Servers

ERP on RAC Oracle Real Application Clusters (Oracle RAC), is an option on the award winning Oracle Database 10g Enterprise Edition. Oracle RAC supports the deployment of a single database across a cluster of servers—providing unbeatable fault tolerance and scalability with no application changes needed. Analysts are taking note of RAC's growing importance in a wide range of customer deployments. This is two node RAC server offering. OS is RHE 4 update 3 or higher.

## 11i Server & R12 Servers

This offering can be of 11i or R12 or both. Vision demo instance is installed on Red Hat Linux, RHE 4 update 4 or higher. Users can practice being Apps DBA, so the stage area is also provided. Developers can learn about interfaces or get trained for techno functional roles at their own pace. Functional people can enjoy their private instances. R12 appliances can offer great excitement to learn about new features and technology stack.

## 10g and 11g Database Servers

Oracle 10g Single Database: Over the last 27 years, Oracle has made tremendous improvements in its core database product. Now, that product is not only the world's most reliable and performing database, but also part of a complete software infrastructure for enterprise computing. With each new release comes a sometimes dizzying display of new capabilities and features, sometimes leaving developers, IT managers, and even seasoned DBAs wondering which new features will benefit them most. Practice at your com-
